Qart.ai · SDC Hackathon 2026 · Domain 1 finalist

From who I am today to where I can be in the AI *era.*

Kydyrgaliyev Meiirman · Mounir Ben Hassine

Xiamen University Malaysia

The problem

89,000 GBS workers face the same *questions.*

OBSERVED

89,000

people in GBS roles rated highly impacted by AI

TalentCorp 2024, p. 48 · 32% of ~250,000

A WORKING AP ANALYST ASKS

01 Which of my skills still count?

02 Which roles can I reach next?

03 What should I learn first?

Our answer in one picture

One journey from CV to an AI-era *path.*

01 · CV

Read your CV

1

stored reading per CV: every skill quotes a CV sentence

→

02 · FORECAST

See the forecast

27

GBS finance roles, Growing to Shrinking

→

03 · OPTIONS

Get ranked roles

21

roles ranked by fit × outlook, each with Why?

→

04 · PLAN

Follow your path

2

step types: steer AI-run work, or do it faster with AI

→

05 · SDG

See your impact

4

SDG targets: 4.4 · 4.3 · 8.2 · 8.5

Two scenarios throughout. You accept or decline every change.

Live evidence

Every number has a source and a *date.*

7 REGISTERED PUBLIC SOURCES

OpenDOSM · employment by occupation	Gov. Open Data ToU
DOSM Job Market Insights · online job ads	Gov. Open Data ToU
Anthropic Economic Index · AI use per task	CC BY 4.0
ILO GenAI exposure index · Gmyrek et al. 2025	CC BY 4.0
O*NET 31.0 · tasks and skills	CC BY 4.0
TalentCorp GBS study 2024 · AI impact	Facts, page-cited
MyCOL 2024/2025 · critical occupations	Names, page-cited

RUNS EVERY NIGHT

01:00 MYT on Replit Scheduled

Stored with source, date, URL and quote

Failed source → last good snapshot

OBSERVED

Daily runs listed 28-31 Oct 2026

Qart's own forecast

Our task model beats guessing by *31%.*

MEAN ERROR, POINTS · LOWER IS BETTER

OBSERVED

5-fold cross-validation · Anthropic Economic Index, May 2026

HOW IT WORKS

2,691 observed tasks

↓

BGE-M3 reads the task wording

↓

Predicts 320 tasks, 17 occupations

↑ Growing · Transforming · ↓ Shrinking · Emerging · Stable

Explainable ranking

Every fit score can be taken *apart.*

FIT — ASSUMPTION

`100 × Σ w·min(claimed ÷ required, 1) ÷ Σ w`

Weights: core 3 · upskill 2 · support 1. Required levels come from cited sources.

ORDER = FIT × OUTLOOK — ASSUMPTION

growing 1.10 · emerging 1.05 · stable 1.00 · shrinking 0.85

OBSERVED

9 /11

current roles find a TalentCorp-listed move in their top 3

8 of 11 with outlook · synthetic profiles

Reskilling for AI adoption

Your own skills become AI-era *skills.*

HOW EACH STEP IS BUILT

A skill you already have

↓

Measured: how much AI already does on its tasks

↓

AI DOES THE ROUTINE	AI HELPS
Check and steer AI-run work	**Do it faster with AI**

OBSERVED

41

checked AI-adopted resources for 28 skills

Kept only if code finds two quotes on the page: the skill's work, and AI used on it.

`Precision at 3: 0.21 → 0.34`

SDG impact

Every step is tied to an SDG *target.*

4.4 Skills for decent jobs	4.3 Affordable learning	8.2 Productivity through innovation	8.5 Full, productive employment	12.6 Green skills, where they apply

OBSERVED Target 90% · not reached

73% → 83%

of required skills have a verified free course (35 of 42)

ESTIMATE Target +50 · not reached

32.1 → 55.8

average best-role fit after the plan · synthetic Hafiz, Mei, Nur

Architecture

Each part of the system does one *job.*

WEB

React app

→

OPENAI

gpt-4.1-mini

Reads CVs, explains in plain words

RUNPOD GPU

BGE-M3 + reranker

Matching and ranking

7 public sources → Scheduled pipeline · daily 01:00 → PostgreSQL

Responsible AI and privacy

The model reads. Code *computes.*

01 · NUMBERS

The LLM never writes a number. Code computes them all.

02 · QUOTES

Every CV and course quote is checked by code.

03 · PEOPLE

PII removed first. Fairness tested. You accept or decline.

Built to run

Built to run beyond the *hackathon.*

OBSERVED

0

failures with 50 people at once

Load test · median 6.2 s

OBSERVED

109 s

median time to a plan

Live site · 3 of 3 under 5 min

ESTIMATE

$0.002

per person, LLM + GPU

10,000 a month ≈ USD 21 + hosting

OBSERVED

452

automated tests

ruff and mypy clean

What makes us different

Four things no job board or chatbot *does.*

01

Our own forecast

with a measured error: 11.2 vs 16.2

02

An AI-era path from your skills

each skill rebuilt around AI

03

Every number sourced and labelled

observed, assumption or estimate

04

The person decides

new evidence proposes; you accept or decline

Go to market and scale

We will start through career *centres.*

CHANNELS — PLAN

TVET and university career centres

GBS employers' HR / L&D teams

PARTNERS TO APPROACH — PLAN

TalentCorp (MyMahir)

HRD Corp

SCALE — PLAN

Public API and embeddable widget

New data packs: GBS IT, shared services

FIRST PILOT

One career centre and one GBS employer: measure time-to-plan and course completion.

Honest limits and next steps

What we have not proven *yet.*

OBSERVED	Free-course coverage is 83%; the target was 90%.
OBSERVED	Only 3 timed users so far; the 10-person test is next.
	Resource labels are model labels; human review is next.
PLAN	GBS finance and accounting only; GBS IT comes next.

Qart.ai · from who I am today to where I can be in the AI era

Know which skills still count, and where to go *next.*
